(72) Inventor(s):

EPSHTEIN, Oleg, Ilich; 4 Samotychny Per., D. 3, kv. 72 Moscow 127473 (RU)

(54) Title (EN): A METHOD OF INCREASING THE EFFECT OF AN ACTIVATED-POTENTIATED FORM OF AN ANTIBODY

(54) Title (FR): PROCÉDÉ D'AUGMENTATION DE L'EFFET D'UNE FORME ACTIVÉE-POTENTIALISÉE D'UN ANTICORPS

(57) Abstract:

(EN): The preset invention provides a method of increasing the effect of an activated-potentiated form of an antibody to an endogenous biological molecule by combining said endogenous biological molecule with an activated-potentiated form of an antibody to endothelial NO-synthase. The present invention also provides a pharmaceutical composition comprising a) an activated-potentiated form of an antibody to an endogenous biological molecule, and b) an activated-potentiated form of an antibody to NO synthase.

(FR): La présente invention concerne un procédé d'augmentation de l'effet d'une forme activée-potentialisée d'un anticorps contre une molécule biologique endogène en combinant la molécule biologique endogène avec une forme activée-potentialisée d'un anticorps contre l'oxyde nitrique synthase endothéliale. La présente invention concerne également une composition pharmaceutique comprenant a) une forme activée-potentialisée d'un anticorps contre une molécule biologique endogène, et b) une forme activée-potentialisée d'un anticorps contre l'oxyde nitrique synthase endothéliale.
